

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

### Listing of Claims:

1. (Currently Amended)      A keypad assembly for a portable radiotelephone comprising:
  - a printed circuit board having a plurality of metal domes;
  - a keypad rubber disposed on the printed circuit board and having bosses formed integrally on the positions corresponding to the plurality of metal domes;
  - a sensing means disposed on the keypad rubber; and
  - a key button part disposed on the sensing means,whereby a touch screen function using the sensing means or a key button function electrically contacting the metal domes is selectively and exclusively used according to ~~the~~ an input mode of the radiotelephone.
2. (Original)    The keypad assembly for a portable radiotelephone according to claim 1, wherein the sensing means is a capacitive sensor.
3. (Original)    The keypad assembly for a portable radiotelephone according to claim 1, wherein the key button part is a film sheet attached to the upper surface of the sensing means, the film sheet having a plurality of numeral keys printed thereon.
4. (Currently Amended)      A portable radiotelephone comprising:
  - an input unit having a keypad which physically integrates a touch screen panel and can alternatively function as ~~[[a]]~~ the touch screen panel;
  - a control unit for generating a control signal to operate the input unit exclusively as the touch screen panel or as the keypad according to an input ~~a the~~ mode set by a user; and
  - a power supply unit for exclusively supplying a driving power to the touch screen panel or the keypad according to the control signal from the control unit.

5. (Original) The portable radiotelephone according to claim 4, further comprising a character recognition unit for converting a coordinate value into a character code when the input unit functions as the touch screen panel, the coordinate value being produced from the input unit by a user's contacting an upper surface of the touch screen panel.

6. (Original) The portable radiotelephone according to claim 5, further comprising a display unit for displaying a character corresponding to the character code from the character recognition unit.

7. (Currently Amended) A method of exclusively operating a touch screen panel or a keypad in a portable radiotelephone having [[a]] the keypad which physically integrates the touch screen panel and can alternatively function as [[a]] the touch screen panel, comprising the steps of:

- determining whether or not an input mode shift key is inputted;
- shifting the input mode from a keypad input mode to a touch screen input mode if the input mode shift key is inputted; and
- cutting off a driving power supplied to the keypad, and supplying the driving power to the touch screen panel.

8. (Original) The method according to claim 7, further comprising the steps of:

- determining whether or not the input mode shift key is inputted;
- shifting the input mode from a touch screen input mode to a keypad input mode if the input mode shift key is inputted; and
- cutting off the driving power supplied to the touch screen panel, and supplying the driving power to the keypad.
